

CONFERENCES

The European Society for Marine Biotechnology arrange conferences, workshops and seminars, often jointly with other organisations and projects.

The next ESMB Conference will be held in Malaga, Spain, 25-26 November 2020

The programme will featured keynote presentations and invited voluntary oral presentations. A particular interest of ESMB is to be educationally oriented, thus providing also a training platform for young researchers and students. Such participants are thus encouraged to submit proposals for oral presentations at the meetings.

Results of previous meetings and information about future meetings are found at <http://www.esmb.org/esmb-conferences.html>

Awards

ESMB encourages young researchers to improve their skills in presenting their research work at conferences and workshops, both as oral presentations and as posters. Together with Springer Publishers ESMB issues awards for best oral presentation and best poster presentation at conferences. Below are shown some recent examples.

BIOPROSP_2019

Unlocking the potential of biomolecules from marine environment, Tromsø, 26-27 February 2019
At this conference ESMB granted two awards to young scientists, sponsored by Springer Publishers.

Cora Hertz

Institute of Pharmaceutical Biology, University of Bonn
Presentation title:
Chromodoris Sea Slugs (Nudibranchia, Gastropoda) and the Resistance Mechanism That Allows Sequestration and Storage of Latrunculin A

Catia Sofia Da Silva Vilas Boas

Faculty of Pharmacy of the University of Porto
Presentation title:
Immobilization of a new eco-friendly antifouling agent in commercial marine coatings

Training in marine biotechnology

ESMB provides a training and exchange platform dedicated to all areas of marine biotechnology. You may submit offers for training which will be displayed at <http://www.esmb.org/training.html>. The aim is to build a comprehensive overview of training courses and other educational opportunities.

Placements

If you are willing to host student(s) to work in your lab, your company, along side your post-docs, R&D employees, etc. please send us the following information

- your name and institution address
- title of a potential project/activity
- key pre-requisites
- duration (with approximate dates)

If you are a student interested to participate in the scheme, please send us the following information

- your name and university course
- expected placement : duration (with approximate dates) & topic
- cover letter and reference letter

Send all placement information to claire.hellio@univ-brest.fr

Member Benefits

The European Society for Marine Biotechnology was established to promote marine biotechnology in Europe and to promote closer research collaboration between marine biotechnologists. The ESMB has educational activities as a top priority, hence the development of methods for effective training and education in the field of Marine Biotechnology is being carried out. A training exchange platform is offered for members. ESMB promotes the exchange of scientific information and co-operation of its members with a view to translating the results of marine biotechnology research to the benefit of society and the environment. This is made possible through the ESMB conferences, meetings and training. The members' journal is **Marine Biotechnology** which is published six times a year. The ESMB board and the office help members and non-members with information and advice.

How to become a member

Membership is open to anyone and no membership qualifications are required.

Membership fees:

- Regular 1 year: 50€
- Student: 25€
- Join a subgroup at no extra cost.

For membership registration and payment of dues go to

<http://www.esmb.org/membership.html>

Contact information

A contact information form is found at <http://www.esmb.org/contact.html>

About European Society for Marine Biotechnology

ESMB was established in France on 26th April 1995 to promote marine biotechnology in Europe and to promote closer research collaboration between marine biotechnologists. In addition, the development of methods for effective training and education in the field of Marine Biotechnology is being promoted. ESMB members work in all fields related to marine biotechnology.
